Competition, Large Commercial and Specialty Project Resume

MIRACLE POOLS

Amazing Pools. Excellent Service.

MIRACLE POOLS

Amazing Pools. Excellent Service.

Miracle Pools, Inc is a Commercial Pool Builder licensed in North Carolina and Virginia. In business since 1990, our expertise centers around large scale commercial swimming pools. We have built commercial projects for private developers, multi-family projects, assisted living, indoor and outdoor competition pools as well as specialty pool facilities for military and federal clients.

We love to assist designers, owners and contractors in the development of their plans and are currently involved with several design-build projects and have completed over 25 design build projects. By incorporating the Miracle Pools early in the design process, we use our construction expertise to coordinate with the owner and the design team to produce beautiful pools that are both economical and efficient for the end user.

Miracle Pools has multiple NC professional engineering partners that assist with bringing pool concepts through design to permit approval. With a home base in eastern NC, and completing dozens of pools in the area, we are very familiar with local jurisdiction requirements as well as NC health codes. Miracle Pools is also a pre-approved pool contractor with multiple national aquatic design firms, including Counsilman-Hunsaker, Aquatic Design Group, Water Technologies, and Aquatics H20.
